PROFESSIONAL SUMMARY

Full-Stack Developer specializing in MERN stack and AI-powered applications, with hands-on experience in authentication, RESTful APIs, real-time systems, cloud deployment, and LLM-based applications. Experienced in building and deploying modern web applications using React.js, Node.js, MongoDB, AWS, and AI frameworks.

TECHNICAL SKILLS

Programming: Java (OOPs, DSA), JavaScript (ES6+, Async/Await), TypeScript, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, React Router, Redux, Redux Toolkit, Thunk, Context API, GSAP
Backend: Node.js, Express.js, REST APIs, MVC Architecture, MongoDB, Mongoose, MySQL, Redis, Vector Databases
AI / LLM: Gemini AI, LangChain, LangGraph, RAG, Tavily, LLM-based Application Development
Cloud & Tools: AWS S3, AWS EC2, AWS Amplify, Docker, Render, Vercel, Git, GitHub, Yargs, Postman, VS Code, Cursor AI, Claude AI, Puppeteer

PROJECTS

Nova Search

MERN, Gemini AI, LangChain, LangGraph, RAG, Tavily, Nodemailer

- Built a full-stack AI-powered search application using MERN, Gemini AI, LangChain, and RAG to retrieve web-based information and generate contextual responses.
- Implemented a **multi-model response evaluation pipeline** that generates two independent AI responses and uses a dedicated judge model to compare their accuracy, relevance, and reasoning.
- Designed a **LangGraph-based evaluation workflow** where the judge provides an explainable verdict, highlighting why one response is more accurate and relevant than the other.
- Implemented **end-to-end authentication and authorization** with JWT, protected routes, and Nodemailer-based email workflows for secure user access.

GitForge – Code Collaboration Platform

MERN, AWS S3, AWS Amplify, Yargs, Git CLI

- Built a GitHub-inspired code collaboration platform using the MERN stack with repository management and core Git functionality including init, commit, push, and pull.
- Implemented a command-line workflow using Yargs to execute Git operations and connect local repositories with the application.
- Integrated Amazon S3 for repository data storage and AWS Amplify for frontend deployment and cloud integration.

React Dooms

TypeScript, OOPs, React Architecture, Class Components, JavaScript, CSS

- Built a lightweight React library from scratch using **OOPs principles**, focusing on component architecture, state management, rendering, and UI updates.
- Applied **classes, objects, inheritance, and encapsulation** with TypeScript and class components to implement the core framework structure.
- Used this custom library to build an Avengers-themed countdown application, applying **OOPs-based component design**, event handling, and dynamic rendering.

ACHIEVEMENTS

- 2nd Prize** – Technical Paper Presentation, Viva Institute of Technology
- 2nd Prize** – Frontend Development Competition, Viva Institute of Technology

EDUCATION

Viva Institute of Technology, Mumbai, Maharashtra	2026
Bachelor of Engineering in Computer Science and Engineering	7.02/10 CGPA
Durgadevi Saraf College	2022
10+2 Equivalent (Science)	56.00%
St Paul High School	2020
Secondary School Certificate	75.65%
